LOOK YOUR AGE

2

If 50 is the new 30 and 60 is the new 40, collective years of high jinks, hilarity and laugh lines can belie a woman's youthful spirit. Here's the latest in doctor-administered wrinkle busters that claim a most natural result. ● Juvéderm is an injectable gel that replaces lost hyaluronic acid, ironing out wrinkles for an even skin finish. The news is in Juvéderm's consistency, trumped to be the smoothest hyaluronic-acid filler on the market. ● Sculptra uses a biocompatible and biodegradable synthetic polymer that coaxes your body to produce its own collagen where you want it. However, this route takes patience. It requires at least three treatments over 2–3 months for collagen to begin multiplying and visibly plump up the face. ● Evolence Breeze combines animal-derived collagen and sugar to specifically treat fine lines. Compared to hyaluronic-acid fillers, there's no risk of swelling and it lasts up to a year.

Don't let laugh lines give away your age
