

Natural-looking results in as little as one hour.

*The safety and effectiveness of combination use has not been clinically evaluated.

In youth, an abundance of two important substances, collagen and hyaluronic acid, keeps the skin looking smooth and supple. Hyaluronic acid adds volume to your skin, while collagen gives it structural support. An emerging trend is to use collagen and hyaluronic acid-based dermal fillers in combination* to replace the skin's structure and volume lost during the aging process.
